

P-38 LIGHTNING STENCILS

LIMITED EDITION

REFERENCES

Stencils decals are designed accordance with publication AERO TEAM No.5 - Lockheed P-38 LIGHTNING. Some of the planes did not have all the stencils applied, or the stencils could have been covered with repaired camouflage colour or individual elements of the camouflage (nose-art, etc.).

For the appearance of a specific aircraft, we recommend use the photos of the real one. The most common difference from the stencils marking standard was absence of the propeller blade manufacturer's logo (stencil decal No. 2).

PRODUCT CONTENT

This product is designed for the ACADEMY's P-38J kit in 1/72 scale. Contains high-quality decals set, for one plane of the early or late version of P-38, printed by EDUARD.CZ. This accessories IS NOT A TOY! Item for adult only. Intended for advanced modelers.
